

Kathryn Winn Board Report

August Board Report, 2011

Student Achievement

- The teachers have been assessing students throughout our first five weeks of school. Teachers have given students the DRA screener, read naturally screener and individual assessments. This week we have started the process of our assessment that took the place of Think Link. The assessment is called the Map assessment. We are on day two of giving this assessment and it is going very well. We should be finished by the end of the week.

Playground

- The first phase of the playground is complete. They put the last load of mulch on the playground and it looks GREAT! We are so excited to have this addition. We are in the process of forming a parent group to help us with the raising of 20,000.00 dollars for our phase two of the playground.

Parent Involvement

- I met with a group of parents and we formed a small committee and are in the process of getting more parents to help with the fall festival and other projects needed for Winn.

Technology

- Leah Spencer has made each child a wiki space. In this space the children will be collecting their technology projects throughout the year.

We have already started this project. I'm attaching this page for your viewing pleasure. This is a sample from one of these wiki sites.

Clubs at Kathryn Winn

We have already started many of our Clubs

- **We have 60 students in our show choir this year. Mrs. Hodge has broken these students into two groups. We are excited to have such a large group of students wanting to participate.**
- **We have also added Dance to our after school club. Mrs. Hedges is teaching about 60 students dance. We are really excited about this addition as well.**
- **Chess, Robotics STLP are starting soon. We are excited about the opportunity to include more students in each of these clubs as well.**

Quad blogging

- **We have two teachers that have joined other teachers in an exciting project called Quad blogging. Mrs. England and Mrs. Leach are very excited to get to know their Quad classrooms from around the world. The teachers take turns visiting each other's classroom making comments answering questions and learning from each other. I'm attaching this site for your viewing pleasure as well.**
